

# 荷兰施托克：150年的成长和创新

荷兰施托克集团（STORK）成立于1868年，在全球拥有1.8万名员工，主要聚焦于石油/天然气/化工/电力/其他工业领域的技术及服务，包括：

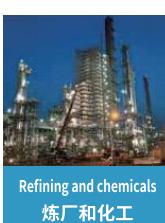

## 1、油气/化工/海洋领域的技术及服务：

- 腐蚀监测/检测技术（在全球已安装超过1,500套系统，包括FSM电场指纹，无线超声在线测厚，保温层下腐蚀监测等多种非侵入式技术）。
- 海管阴极保护检测及监测技术（拥有近7万公里海管及1千多个平台的检测业绩）。
- 新型复合材料防腐及补强（适用于海管、平台、飞溅区等水下/水上易腐蚀区域）。
- 热态螺栓更换专利技术及法兰全面管理方案。
- 沉箱全面管理及检查维修。
- 其他技术服务：无损检测/热处理技术/表面处理/除沙/接近技术/平台及FPSO暖通空调等等。

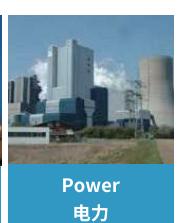

## 2、进口转动设备的维修及升级改造（透平/叶片/齿轮箱/压缩机/泵/发电机等）：Stork是欧洲最大的转

## Rijk stelt 4,4 miljoen euro beschikbaar voor Waterstof Erflanden

De gemeente Hoogeveen krijgt via het Programma Aardgasvrije Wijken een bijdrage van 4,4 miljoen euro om in een deel van de wijk Erflanden aardgas te vervangen door groene waterstof. Dat kan door het bestaande aardgasnetwerk te gebruiken voor het vervoer van waterstof en door de huidige cv-ketels te vervangen door waterstof cv-ketels. Het doel van het landelijke Programma Aardgasvrije Wijken is om te leren op welke wijze de wijkgerichte aanpak kan worden ingericht en opgeschaald. Wethouder Werner ten Kate is blij met deze toekenning: "Met deze bijdrage kunnen we aan de slag in Erflanden, samen met de bewoners en onze samenwerkingspartners, om te komen tot draagvlak en uitvoeringsplannen."

Europese miljoenen voor ontwikkeling waterstoftechnologie in Noord-Nederland

20 augustus 2019  
Noord-Holland is door Europa aangewezen als de regio waar de toekomende jaren de grondwaterstofindustrie zich verder moet ontwikkelen. Vanuit Brussel gaat er € 20 miljoen subsidie naar het project Hydrogen Valley, gericht op de ontwikkeling van een volledig functionerende groene waterstofketen. Het project loopt in totaal € 90 miljoen, duurt zes jaar en gaat begin 2020 van start.

Internationale steun

De subsidieruiming is ingezien door HEAVENN, een samenwerkingsverband van 31 publieke en private partijen uit zeven Europese landen. De leidende partijen bij de aanvraag waren het **Samenwerkingsverband Noord-Nederland SNN** en de **New Energy Coalition**. Bij het project worden de partijen internationaal ondersteund, onder meer vanuit de Verenigde Staten en Japan. Het HEAVENN-project is bijzonder, omdat het de hele waterstofketen omvat en verbindt telkens vier geografische regio's.

Tupras (Turkey)	60%

- Burner Projects (retrofit) for solely H<sub>2</sub> gas:
- 燃烧器项目(改造): 100%氢气燃料, 实施业绩包括:

	H <sub>2</sub> % in fuel gas
SABIC BoZ	100%
Solvay Tavaux (Fr)	100%
AKZO Hengelo	100%
Vynova Tessenderlo	100%

# Hydrogen Development Stackless Boiler

## 氢能应用 - 无烟囱锅炉

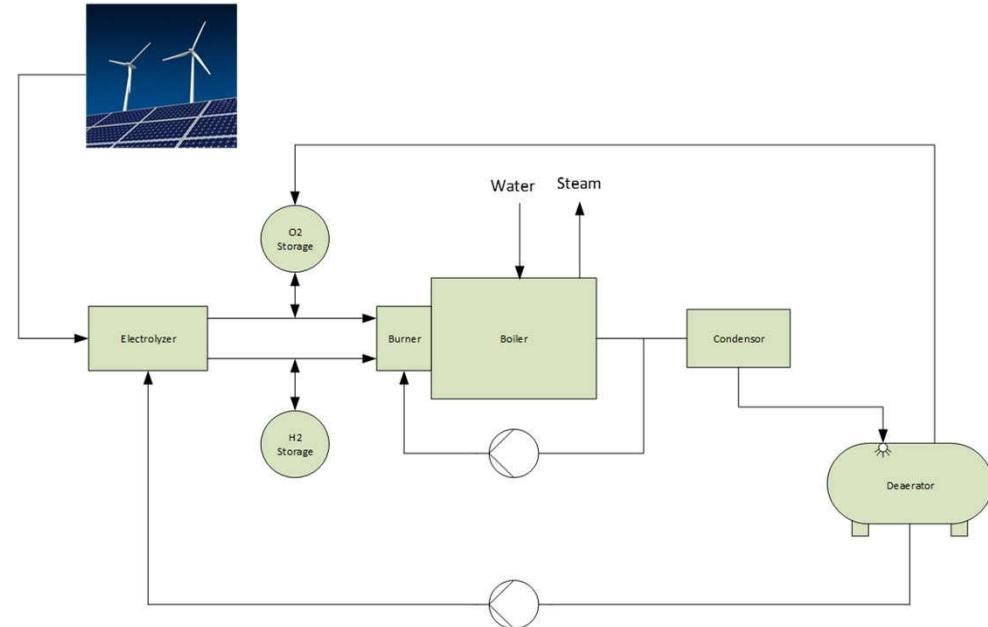

### Characteristics 特点

- Hydrogen + Oxygen produced by electrolyzers 电解槽产生的氢+氧
- No CO<sub>2</sub> during combustion of Hydrogen 燃烧无CO<sub>2</sub>
- Combustion of hydrogen with air -> high NOx 氢气与空气的燃烧产生高NOx
- Combustion of hydrogen with Oxygen -> no emission, just water 氢与氧的燃烧: 没有排放, 只有水

### Goal 目标

Develop possible solution to retrofit existing boilers to eliminate emissions

开发改造现有锅炉以消除排放的可能解决方案

# Hydrogen Development Asphalt heating

## (九) 氢能应用 - 沥青加热系统

- Cooperation: A Dutch Asphalt company 某一荷兰沥青公司
- Reason: More stringent demand from government for sustainable production of asphalt 政府对沥青可持续生产的更迫切需求
- Assignment: Development of a heating system to recycle asphalt in a sustainable way. 开发加热系统，以可持续的方式回收沥青
- First phase: Design and delivery of bitumen heater on Hydrogen. 氢燃料沥青加热器的设计和供货
- Second phase: Design and delivery of a heating system on Hydrogen for asphalt kilns. 沥青窑氢加热系统的设计与供货
- Number of sites: First of 7.
- Current status: Phase 1

## (十) 在荷兰格罗宁根建设氢气管网 (200/50/8 bar)

Build a 200 bar, 50 bar and 8 bar Hydrogen net at Energy Transition Center Groningen. Start construction sept 2020.

在格罗宁根能量转换中心建造一个200巴、50巴和8巴的氢气管网。  
2020年9月开工建设。

Stork所提供的服务：

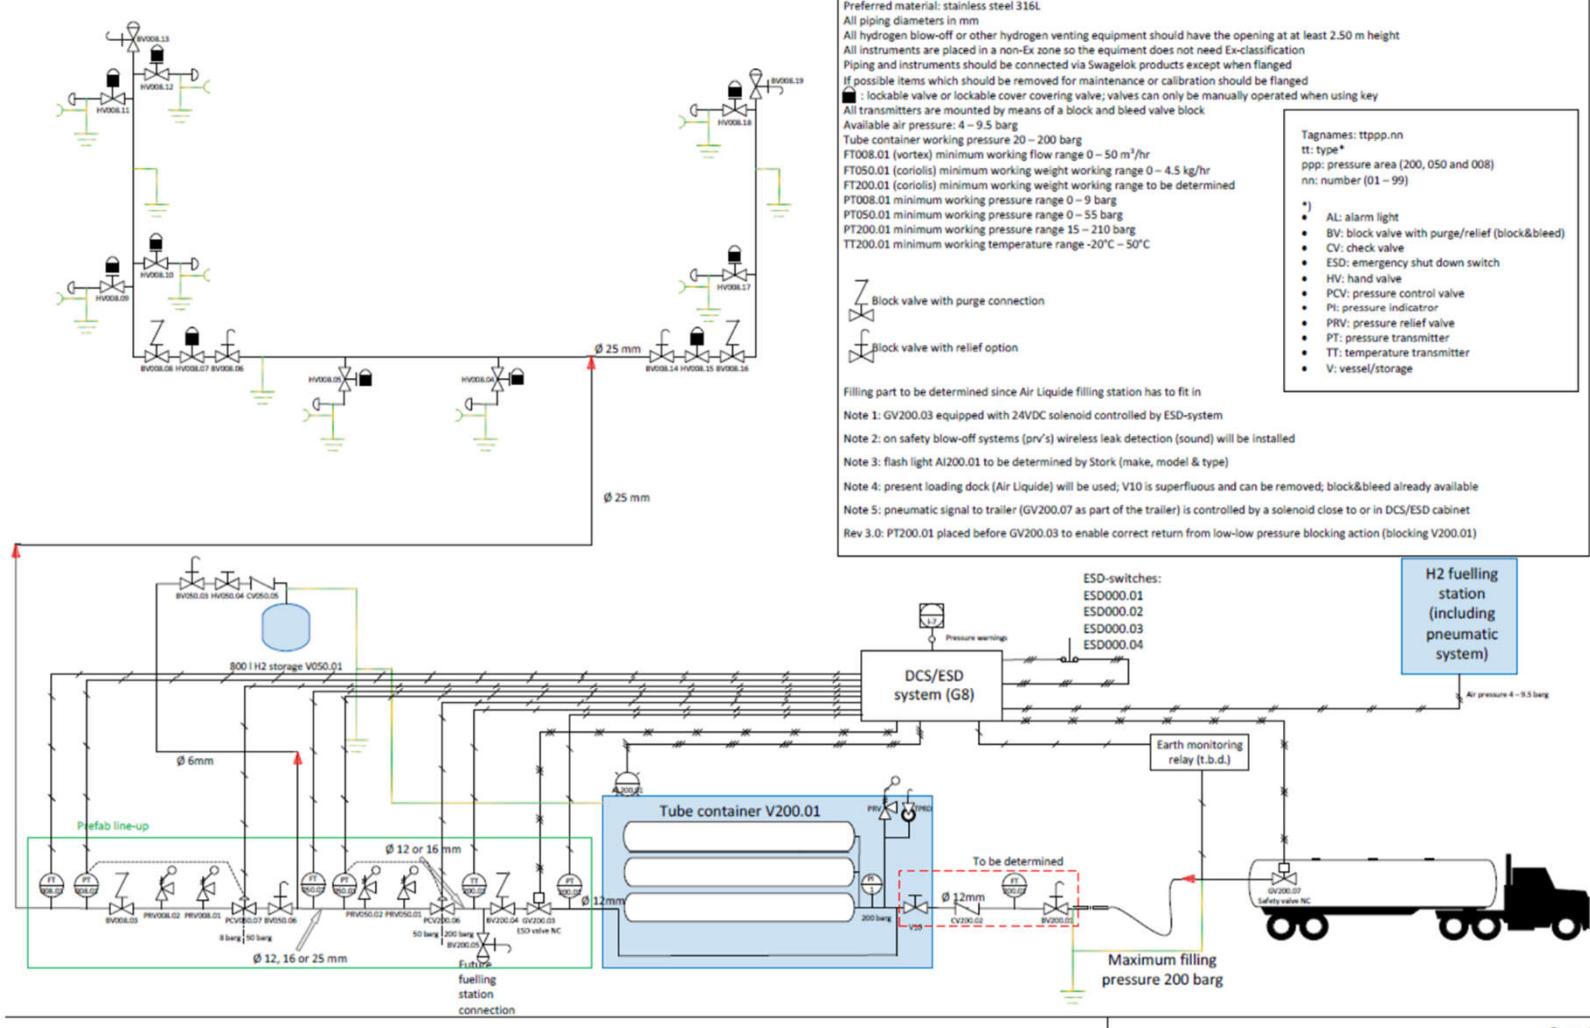

- Piping 管道系统
- Instrumentation 仪控
- Safety instruments and loops  
安全仪表和回路

<http://www.fluor.com/about-fluor/videos>

*Stork是Fluor旗下全资子公司*

## Abstract 摘要

Fluor uses multiple routes to address the needs of the hydrogen market. Fluor's patented process for hydrogen recovery provides a cost effective method for recovery, reduces the cost of recovery with simultaneous by-product. Fluor also has experience in "trigen" projects, an environmentally friendly process with tight control on NO<sub>x</sub> and SO<sub>x</sub> emissions, that concurrently produce hydrogen, power, and steam by gasification of either residue or petroleum coke. Lastly, Fluor uses the steam reforming of light hydrocarbons to meet the requirements of a specific site.

Fluor利用多种途径来满足氢气市场的需求。Fluor的氢回收专利工艺提供了一种成本效益高的回收方法，降低了回收成本，同时产生副产品。Fluor还拥有“trigen”项目的经验，这是一种严格控制NO<sub>x</sub>和SO<sub>x</sub>排放的对环境友好工艺，可同时生产氢、电能，通过残渣或石油焦的气化产生蒸汽。最后，利用轻烃的蒸汽重整来满足特定场所的要求。

## Client Benefits

Fluor can offer Clients a "complete hydrogen solution" that includes:

- Hydrogen management studies, 氢气管理研究,
- Hydrogen plant revamp studies, 氢气装置改造研究
- Steam reforming technology, 蒸汽重整技术
- Gasification technology, 气化技术
- Hydrogen recovery from fuel/waste streams 从燃料/废物流中回收氢气

<https://www.fluor.com/about-fluor/corporate-information/technologies/hydrogen-supply-systems-optimization>

# Hydrogen Experience: Stork 总结 (1) : Stork (施托克) 氢能经验

---

Stork及其母公司Fluor至今已涉足近百个氢能项目，包括灰氢/蓝氢/绿氢项目。

Ambition to be the firm recognized as industry reference & leader in Renewable Energy, especially in the field of Hydrogen. For Consulting, Engineering, Project management, Construction, Maintenance and Asset management.

Stork 致力于成为业界公认的可再生能源，特别是氢能源领域的领先者，从事咨询、工程、技术及设备、项目管理、施工、维护和资产管理。

Selective experience includes: 可选性的经验包括：

- Pipelines to/from industrial sites
- 进出工业场地的管道
- Maintenance and calibration of H2 fueling stations in NL/B
- 荷兰/比利时加氢站的维护与标定
- Development of stackless boiler concept (burning H2 with O2 only)
- 氢气燃烧器和无烟囱氢能锅炉的发展
- Construction of H2 grids (200, 50 and 8 bar) at Energy Transition Center in NL
- 在荷兰能量转换中心建造/改造氢气管网 (200巴、50巴和8巴)
- Mechanical construction scope for 1 MW electrolyser Gasunie Zuidwending, NL
- 荷兰 Zuidwending 电解槽机械施工范围
- EU Research report “Roadmap for Green Hydrogen” (GE2GH2)
- 欧盟研究报告“绿氢路线图” (GE2GH2)

# Hydrogen Plant Experience: Fluor 总结 (2) : Fluor (福陆, Stork母公司) - 氢能经验
